

Supporting Information

for

Very important paper

M. Mustermann, C. Musterfrau

April 30, 2025

Contents

S1: Mathematical background	2
Note S1: Derivation of XXX	2
Note S2: Derivation of YYY	2
S2: Additional results on ...	3

List of Tables

S1	Important results on	3
S2	Not so important results on	3

List of Figures

S1	Interesting figure	3
----	------------------------------	---

S1: Mathematical background

Note S1: Derivation of XXX

First we have to realise that

$$1 + 1 = 2 \tag{S1}$$

and this will allow us to find that

$$\iint \Psi(x, y) \sin(x) dy dx = -\frac{\pi}{2} \tag{S2}$$

which then means that

$$\langle \Psi_I | \hat{H} | \Psi_J \rangle = \delta_{IJ} \tag{S3}$$

Note S2: Derivation of YYY

S2: Additional results on ...
